

Note Taking using Audio Notes app

Training Goal

Consumer with learning disabilities frequently struggle with note taking requirements in interviews, as well as on the job. This hands-on experience will allow VR staff to experience technology to support and manage multi step directions.

Before starting this activity verify if you already have Audio Notes downloaded to your VR iPad.

VR Data Center has available for VR Staff the Paid Version of [AudioNote](#) . Please contact Tibor Moldovan by E-mail for the code to install Audio Notes.

For today's activity if you do not have full version you may use the Free version, Audio Notes Lite.

Go to Apps Store on your iPad and Download [AudioNote Lite](#) Free version. You will need to enter your Apple ID: XXXXXXXX to start the download.

Open your [AudioNote](#) · [AudioNote Lite](#) app.

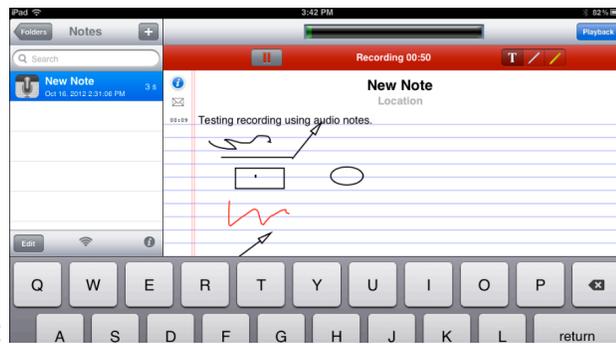

Example of a page you will see:

Basic tools needed to start using.

- 1) Your writing tools:  Touch each button and then touch the sheet of paper to see what options you can use to write with.
- 2) Record tool:  Touch it to see this button  and you are now recording.
- 3) Press  again and you will turn off recording and the button will look like this .

Note Taking using Audio Notes app

Completed This Example:

4) To listen to Audio Notes you will need to click on the Playback button

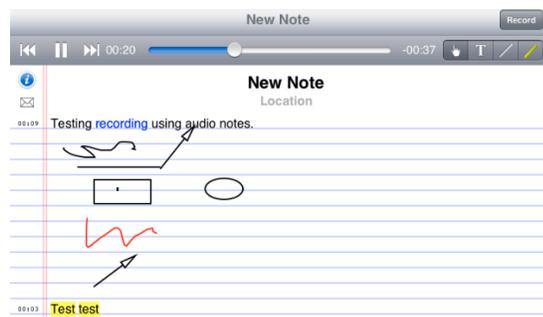

6) Now you are in the screen to listen to Audio Notes. Press this button

7) And your screen will look like this

. Touch on the text or drawing and any audio recording will play back out-loud.

If you would like to continue adding text and recorded information to this document click

on  and you will switch back to your  screen and begin recording and writing.

Each New Note can be Titled and Dated and saved so you may listen to or add to the same note on another date and time if you choose to.
